

SEWER MANHOLE MASTER®

Repair Trailer

Quality • Dependability • Service

The Sewer Manhole Master Repair Trailer is the toughest, most easiest to use trailer for performing close-up sewer manhole repairs. This multi-component combination is ideal for quick access and rear easement repairs. Its superior design withstands the harshest weather conditions and delivers the greatest production ratios in half the time of competitive pumps.

This trailer package features the combined strengths of street level on-the-spot repairs, adjustable rotor-stator cement pumping technology, 18 HP electric start gasoline engine dependability, City Approved Water Gap Systems and a 300-ft hose reel retrieval system for cleaning. These components come together to create the most extreme features in a trailer that result in lower ownership cost and manufacturers quality you can count on.
